EYES IN THE SKY

By: MJ

"INSECT SPY DRONE"

tification (RFID) tracking device under your skin.

ARGUS surveillance software has made it possible for a high resolution camera that can be placed inside a pod attached to the belly of an Unmanned Aircraft Vehicle (UAV).

From 17,000 feet in the sky, this camera can zoom in on specific areas as small as 6 inches and can even generate a picture showing the types of cloths people are wearing.

The software in the camera can store equivalent to 5,000 hours a day in pictures. In the future technology will make it possible for UAV's like drones to stay airborne for years at a time.

We are moving to an increasing electronic society where our movements are going to be tracked.

Freedom (a state in which somebody is able to act and live as he or she chooses, without being subject to any undue restraints or restrictions) is quickly becoming a part of history. What is happening in the world that this type of surveillance is necessary? Question might be who wants and why do they need this type of information on the populace.

A LETTER OF THANKS!

Just wanted to share with all of the town of Dillonites that I was directed here over 21 days ago. I came on the Wings of a Prayer and was taken into the care of your Domestic Violence Advocacy Program.

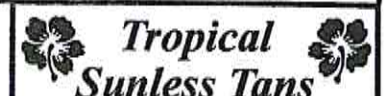

Here I was given kindness and hope. I was given a place to stay by a young woman who also had much on her plate, but she recognized my need.

I came with a service dog "Springer". Every store, every cafe, the museum, hospital, the judge, Les Schwab and Vineyard Church all welcomed us.

I was so broken, yet you loved me. Jesus said when you do this to the least of them, you've done it unto Him. You did, you are. God lives in your town through you.

Thank you and bless your going out and coming in. Please consider giving to your local crisis center and continue sowing the seeds of kindness, caring and giving.
