CITY STREETS - POSSIBLE CLOSURE

By: MJ

The Streets and Ally Committee have an engineer evaluating the triangle down by school where Parkview, Walnut, Nevada intersect and also the possibility of narrowing Walnut Street up. Some suggestions have been European style 'round-about', a raised concrete sidewalk a 'boulevard' or wider sidewalks on Walnut Street... A couple suggestions made by citizens at the meeting to fix the problem, the Street and Ally Committee perceive is: post speed limit signs, add a couple stop signs, a yield sign...

Question: Would the citizen's suggestions correct a problem? At the meeting it was said that it was a dangerous intersection however no facts or figures supporting that statement were presented and no engineer costs were discussed.

With Walnut Street being a main route through town it is nice to have it wide enough to open your vehicle door and not have passing traffic close enough to take your door off. You might have had this experience if you have ever parked and were getting out of your car by Club Bar or Printing Place while traffic is rushing to get through the green light before it changes to 'red'.

Streets and Alley Members are: Dick Achter - Chairperson, David Spehar, Lynn Westad, and Bob Cottom.

... and the odds that they are all intertwined in the same scandal????

The odds of winning the Florida lottery are 1 in 22,957,480.

The odds of winning the Powerball is 1 in 175,223,510.

The odds of winning Mega Millions is 1 in 258,890,850.

The odds of a disk drive failing in any given month are roughly one in 36. The odds of two different drives failing in the same month are roughly one in 36 squared, or 1 in about 1,300. The odds of three drives failing in the same month is 36 cubed or 1 in 46,656.

The odds of seven different drives failing in the same month (like what happened at the IRS when they received a letter asking about emails targeting conservative and pro Israeli groups) is 37 to the 7th power = 1 in 78,664,164,096. (that's over 78 Billion) In other words, the odds are greater that you will win the Florida Lottery 342 times than having those seven IRS hard drives crashing in the same month.

Mr G Science Show

Glenn Govertsen is a retired physics teacher turned science entertainer. His science show is scheduled as part of Dillon Public Library's summer reading program on Thursday, July 17 at 10:00 a.m. in the Old Depot Theater. Mr. G puts on a captivating and entertaining show while teaching high-level scientific theory about such things as electricity, the laws of gravity and the properties of light.

Mr. G is a frequent presenter at teacher conferences and science camps across the nation and has even presented his show at Disney World. During his teaching career he was awarded the Presidential Award for Excellence in Science Teaching, the Tandy Technology Scholars Award, the Whitman College Outstanding Secondary Teacher Award and the Montana Science Teacher's Association Award for physics. The show lasts close to an hour and a half, and Mr. G uses that time to inspire young minds and motivate students to do something in life that is meaningful to them. And he has fun with science as he achieves that goal.

Hope to see you Thursday morning, July 17th at 10:00 a.m. for this amazing, entertaining and educational science show! All Dillon Public Library programs are free and open to the public. Children 5 years old and younger must be accompanied by a parent or caregiver.

**Water costs money . . .
Don't waste it!**

**Conserve Water and
Save Money!**

A dripping faucet or fixture can waste 3 gallons of water a day . . . A total of 1095 gallons a year.

Did you know?

Water Loss in Gallons At 60 p.s.i.	
Leak This Size	Loss Per Month
• 1/32"	6,000 Gallons
• 1/16"	25,000 Gallons
• 1/8"	100,000 Gallons
• 1/4"	400,000 Gallons

Some things to look for—

- Do you have leaky faucets?
- Does your toilet leak? Ninety percent (90%) of all leaks are due to faulty toilet fixtures.
- Do you have leaky shower-heads?
- Do you check your meter and bill to track your usage?
- Is your irrigation system on an automatic timer?
- Is there a pitcher of drinking water in your fridge?
- Do you have a turn off nozzle on the end of your hose?

If you leave a garden hose running, without a sprinkler or nozzle, how much water are you using?

Water Usage in Gallons

At 60 p.s.i

- 1/2 inch hose—46* gallons per minute
- 2760* gallons per hour
- 5/8 inch hose—118* gallons per minute

**Saving water is easy
when you think about it.**

Here are some tips to help you save water and save on your water bill. It might surprise you just how easy it is to save water—and money—around your home.

- * Keep showers to under 5 minutes.
- * Do you have a low flow shower head?
- * Use only a little water in the bathtub.
- * Turn off the water while brushing your teeth.
- * Put water in sink when washing up.
- * Flush the toilet only when necessary. Do not use it to flush tissues or cigarette butts.
- * Use a bucket when washing the car.
- * Use a turn-off nozzle on the end of the hose to adjust the water flow and turn the water off and on.
- * Turn water faucet off tight.
- * Put water in the kitchen sink to wash and rinse dishes.
- * Run the dishwasher only when it is full.
