Influenza Vaccine is Here!

Flu vaccine is now available through Beaverhead County Public Health. CDC recommends a yearly flu vaccine for everyone 6 months of age and older as the first and most important step in protecting against this serious disease. While there are many different flu viruses, the seasonal flu vaccine is designed to protect against the top three or four flu viruses that research indicates will cause the most illness during the flu season. People should begin getting vaccinated soon after flu vaccine becomes available, ideally by October, to ensure that as many people as possible are protected before flu season begins.

In addition to getting vaccinated, you can take everyday preventive steps like staying away from sick people and washing your hands to reduce the spread of germs. If you are sick with flu, stay home from work or school to prevent spreading flu to others.

The timing of flu is very unpredictable and can vary from season to season. Flu activity most commonly peaks in the U.S. in January or February. However, seasonal flu activity can begin as early as October and continue to occur as late as May. It's not possible to predict what this flu season will be like. Flu seasons are unpredictable in a number of ways. While flu spreads every year, the timing, severity, and length of the season varies from one year to another.

CDC recommends that people get vaccinated against flu soon after vaccine becomes available, preferably by October. It takes about two weeks after vaccination for antibodies to develop in the body and provide protection against the flu.

Those children aged 6 months through 8 years who have never received flu vaccine will need two doses of vaccine and should receive the first dose as soon as possible to allow time to get the second dose before the start of flu season. The two doses should be given at least 4 weeks apart.

Starting in 2014-2015, CDC recommends use of the nasal spray vaccine (LAIV) for healthy children 2 through 8 years

of age, when it is immediately available and if the child has no contraindications or precautions to that vaccine. Recent studies suggest that the nasal spray flu vaccine may work better than the flu shot in younger children. However, if the nasal spray vaccine is not immediately available and the flu shot is, children 2 years through 8 years old should get the flu shot. Don't delay vaccination to find the nasal spray flu vaccine.

For everyone, getting vaccinated each year provides the best protection against influenza throughout flu season. It's important to get a flu vaccine every year, even if you got vaccinated the season before and the viruses in the vaccine have not changed for the current season.

Public Health offers flu vaccine every Wednesday from 9-1 and 2-5. We will be offering the popular "DRIVE-THRU" clinic on Friday, October 3rd from 11:30am to 2:30pm (location to be determined). The cost of the vaccine is \$25.00. If a business would like us to provide flu vaccine at their place of business (5 employees or more) please call us to arrange a date.

For more information, please call 683-4771 or stop by the office at 41 Barrett Street.

EMPLOYEE OF THE YEAR

Dillon Womack is working in Seattle at Safeco field. The company he works for has many departments from culinary, management, warehouse, laundry, payroll and maintenance.

Dillon graduated from Le Cordon Bleu College of Culinary Arts on the Presidents List and top of his class. He has been promoted to lead line cook since starting in April. He won the honors of employee of the month for July. Last week before the Mariners game he was escorted onto the field and they announced before the crowd that he was Employee of the Year! Congratulations Dillon, grandma Viv is so proud she taught you to cook and enter all those things you won awards on at the fair.
