BULLDOGS ADVANCE TO SWEET SIXTEEN

Montana Western shook of the first round jitters midway through the first half and claimed a victory of 16 seed Benedictine 80-77 at the Buffalo Funds-NAIA Men's Basketball Division I National Championship.

The Ravens built a 14-point lead midway through the first period behind a 44 percent shooting effort from three. The Bulldogs were led by Frontier Conference Player of the Year Dexter Williams Jr. with 13 first half points and first team all-conference selection Stephen McCall with 12 points in the half. The Bulldogs comeback was fueled by 57 percent shooting from the floor and a 7-7 effort from the free throw line as Montana Western claimed a 43-39 lead at the intermission.

In the second half Williams Jr. and McCall proved to be too much for the Ravens to handle. "Dexter and Stephen were outstanding tonight," Bulldog head coach Steve Keller commented. "Combined they were 22-22 from the free throw line and 14-24 from the field."

McCall led the scoring with 36 points in more than 38 minutes of play. Williams Jr. was the only other Bulldog in double figures with 17 points and 7 defensive rebounds in 39 minutes on the floor.

"This was a total team effort," Keller said. "Benedictine was a very good team and we had to play exceptionally well to get the win tonight."

The Bulldogs will take on No. 1-seeded Hope International, which knocked off Philander Smith (Ark.) in its first round game, on Friday, March 20 at 6:15 p.m.

OPENING OF A NEW TRINA HEALTH CLINIC

Julie and Ron Briggs will be opening a new Trina Health Clinic on April 20th, 2015. This is great news for diabetics.

The Science behind Trina Therapy is unfortunately, as diabetics know, tight blood sugar control, diet, and exercise will not reverse the complications of diabetes.

All of the cells in our bodies have one or more mitochondria. these mitochondria are sometimes described as "cellular power plants" because they generate most of the cell's supply of adenosine triphosphate (ATP), the source of chemical energy for the cell to perform its function.

All diabetic people do not properly "burn sugars" (metabolize carbohydrates) and thus have less cellular energy. This is because the liver is not processing he enzymes necessary for proper metabolism.

These enzymes are normally produced when the pancreas signals the liver via insulin oscillations that food are present. The pancreas of both type 1 and type 2 diabetic people doesn't send this required signal and thus the liver cannot fully perform its function and carbohydrate metabolism is depressed.

The Artificial Pancreas Treatment® provides these necessary insulin oscillation signals causing the liver of the diabetic patient to produce the enzymes required for proper metabolism. This results in every cell in the body regaining the ability to metabolize carbohydrates more normally, which leads to increased cellular energy levels. This improved metabolism provides the individual cells and organs the energy they need to repair themselves.

This is how the Artificial Pancreas Treatment® addresses the core problem (the inability to properly metabolize carbohydrates) and thus stops, retards or reverses all of the complications of diabetes.

Finally, you can now stop, and in most cases, reveres the complications of diabetes with the clinically-proven Artificial Pancreas Treatment.

Dr. Ford Gilbert will be here for community and medical staff presentations and for the Open House.

You can call and set up appointments for April 20th or for information contact Julie 925-0285.

COMMENT PERIOD OPENS FOR BIG HOLE CLOSURE RULE

Montana's Fish & Wildlife Commission is seeking comment on a proposed closure of a section of the Big Hole River for public safety reasons associated with the reconstruction of Silver Bridge near Divide, Montana.

Upon approval by the Fish & Wildlife Commission and local authorities, the closure rule would involve the Powerhouse Fishing Access Site (FAS) and a portion of the Big Hole River 1,000 feet above and below the Powerhouse FAS.

The construction will take place this summer and into the fall. The contractor will be required to maintain float passage through the construction area (with exceptions to allow for short-term closures of the river or FAS to avoid public hazards during certain periods).

More information on the closure rule can be found at: http://fwp.mt.gov/news/publicNotices/rules/pn_0187.html

Individuals may comment on the webpage or email their comment to BigHoleRiverClosureRuleComments@mt.gov, or send their comments to Montana Fish, Wildlife & Parks Fisheries Division, P.O. Box 200701 Helena, MT 59620-0701.

Comments will be accepted through April 17, 2015.
