New Montana state record walleye caught in Holter Lake

Montana anglers have landed six new state record fish since last August. On May 10, Trevor Johnson of Helena added a seventh whopper to that list when he reeled in a nearly 3-foot-long walleye from Holter Lake near Helena. Johnson's fish weighed in at 18.02 pounds on a certified scale, measured 32.25 inches in length, and 22 inches in girth. He caught the record-setting fish on a jig.

The previous state walleye record was set in 2007 with a 17.75-pound fish from Tiber Reservoir.

Other recent state record fish include a chinook salmon caught last August, a smallmouth bass in October, a yellow bullhead in December, a brown trout in February, a longnose sucker in March, and a largemouth bass in April.

With a total of 91 native and introduced fish species found in Montana, interest in fish records has increased in recent years. Montana Fish, Wildlife & Parks maintains the list of record fish, and it is available on FWP's website at <https://fwp.mt.gov/fish/anglingData/records>

Anglers who think they caught a state record fish should keep the following things in mind:

- To prevent loss of weight, do not clean or freeze the fish. Keep the fish cool — preferably on ice.
- Take a picture of the fish.
- The fish must be weighed on a certified scale (found in grocery stores or hardware stores, etc.) and witnessed by a store employee or other observer. Obtain a weight receipt and an affidavit from the store personnel if no FWP official is present. Measure the length and girth.

Contact the nearest FWP office to have the fish positively identified by a fisheries biologist.

L.S. Ready Mix Concrete

L.S. Ready Mix Concrete, Inc. would like to clarify some issues that have been occurring in the area. During 2020, we started using a cement/slag blend purchased from Lafarge PNW Inc. We chose to use this blend for improved workability, smoother surfaces, and longer service life. Cement/slag blends are widely used around the country. The Montana Department of Transportation requires a slag or fly ash blend on all bridge work in the state. Flatwork finishing of a cement/slag blend requires proper timing and premature finishing with these blends should be avoided. Information about slag is available from the Slag Cement Association at www.slagcement.org, for more information about Portland Cement, visit the Portland Cement Association at www.cement.org.

There have been some occurrences of delamination in some concrete flatwork that was completed last year. Delamination is the separation of the paste layer at the surface, creating an unbonded concrete layer between there and the slab body, and is caused by premature finishing.

Another issue we are seeing is the use of deicers on concrete, either deliberately or inadvertently. Deicing products, such as magnesium chloride, are used to melt snow on streets, roads and highways. The wet, salty slush left on the roadways can collect on our vehicles, then be deposited on our driveways. All salts (chlorides) used for deicing are corrosive. Deicers allow concrete to become "super saturated" and hold more water. More water means more expansion during freeze/thaw cycles. Also, new concrete in the first two years is especially susceptible to the effects of deicing products and to water, snow and ice collection on the surface. Snow and ice should always be removed from concrete.

We carry several cures and sealers to help extend the life of your concrete. Please inform us or your contractor about what your concrete will be used for so it can be determined what products should be used to cure and seal your concrete. Although concrete is considered a "low maintenance" building material, it is not maintenance free. L.S. Ready Mix Concrete, Inc. and your concrete contractor have no control over the care and maintenance of your

THE DILLON DOWNTOWN STREET DESIGN AND PLAN

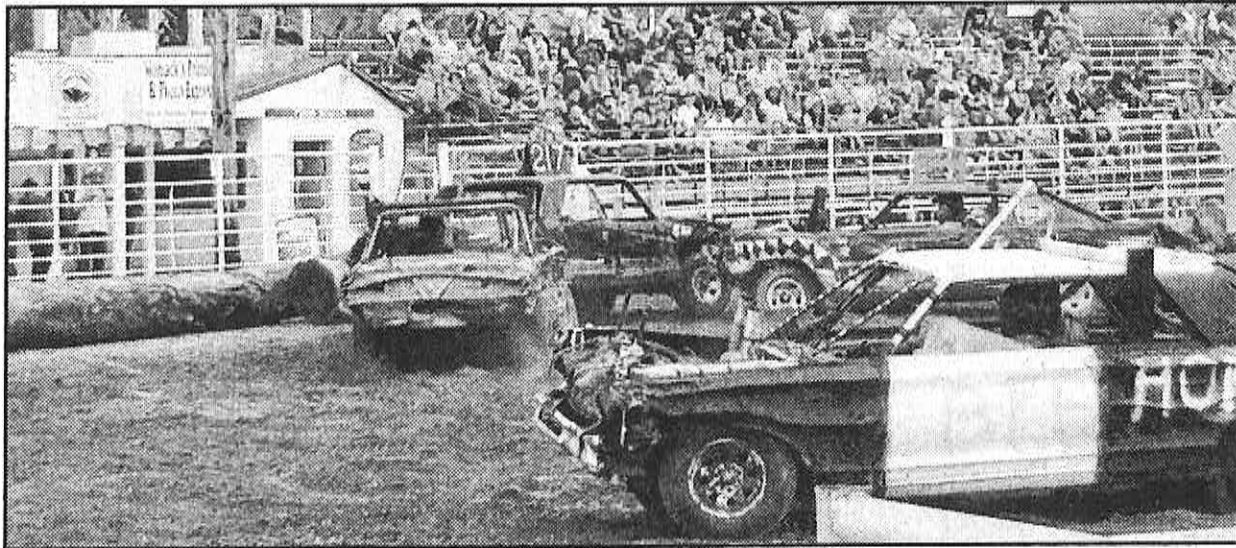

The community is requesting the assistance of a qualified firm to develop a downtown street design and plan to create pedestrian improvements; improvements for the central business district and a corridor along Montana Street; and to expand upon a test project that was completed in 2017. This work will ensure that the community can grow while maintaining its unique character and creating an environment that will support economic development and small business growth. The Dillon Downtown Street Design and Plan should adopt a strategic planning process, including: analysis of existing opportunities and issues; direction setting (mission statements, vision and values, goals and objectives, etc.); alignment (determining our path); implementation and execution (layout an action plan for achieving the stated goals); and evaluation (regular check-ins, measuring performance and success, and course corrections).

PROPOSED FLOOD HAZARD DETERMINATIONS DEPARTMENT OF HOMELAND SECURITY FEDERAL EMERGENCY MANAGEMENT AGENCY Proposed Flood Hazard Determinations for Beaverhead County, Montana and Incorporated Areas

The Department of Homeland Security's Federal Emergency Management Agency has issued a preliminary Flood Insurance Rate Map (FIRM), and where applicable, Flood Insurance Study (FIS) report, reflecting proposed flood hazard determinations within Beaverhead County, Montana and Incorporated Areas. These flood hazard determinations may include the addition or modification of Base Flood Elevations, base flood depths, Special Flood Hazard Area boundaries or zone designations, or the regulatory floodway. Technical information or comments are solicited on the proposed flood hazard determinations shown on the preliminary FIRM and/or FIS report for Beaverhead County, Montana and Incorporated Areas. These flood hazard determinations are the basis for the floodplain management measures that your community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program. However, before these determinations are effective for floodplain management purposes, you will be provided an opportunity to appeal the proposed information. For information on the statutory 90-day period provided for appeals, as well as a complete listing of the communities affected and the locations where copies of the FIRM are available for review, please visit FEMA's website at https://www.floodmaps.fema.gov/fhm/BFE_Status/bfe_main.asp or call the FEMA Mapping and Insurance eXchange (FMIX) toll free at 1-877-FEMA MAP (1-877-336-2627).
